

PRELIMINARY Not for Construction

- Notes:
1. All building permits to be consistent with the approved site plan. The Planning Department does not review building permit sets, so it is the developer's responsibility to ensure that elevations submitted in the building permit set match those approved during the site plan review process. If the elevations do not match those in the site plan, it will delay the issuance of a Certificate of Occupancy at the end of construction, and may necessitate modifications to the constructed building.
 2. All vent pipes, etc. extending above the roof surface must be painted a color that blends with the roof color.
 3. All rooftop mechanical equipment shall be screened from offsite views.
