Consult Conservation Officer or Soil Conservation Service for additional information concerning other alternatives for vegetation of disturbed areas. The above vegetation rates are those which do well under local conditions; other seeding rate combinations are possible.

***Disturbance is based according to current season for desired permanent vegetation. Do not allow any temporary cover to grow over 12" in height before removal, otherwise failure may be related due.

- CONSTRUCTION SEQUENCE**
1. Obtain Grading Permit.
 2. Install all erosion control measures as shown.
 3. Obtain Certificate of Compliance through on-site inspection by Town Erosion Control Engineer.
 4. Proceed with grading.
 5. Clean sediment basins when half full.
 6. Seed and mulch denuded area within 30 days after finished grades are established.
 7. Maintain soil erosion control measures until permanent ground cover is established.
 8. Request final approval by Town Erosion Control Engineer.
 9. Remove soil erosion control measures and stabilize these areas.
